

How to Choose a Construction Camera Vendor

Choosing the right construction camera vendor is critical to a project's success. This industry has its unique requirements, and not all vendors are a good match in terms of what they offer and how they'll support you.

This checklist is designed to guide you through the vendor evaluation process by helping you **ask the right questions and gather the necessary information** to make an informed choice. Take a close look at what each vendor offers to determine if their product and services are the best solution to document and secure your jobsite.

Equipment

- ☐ What camera options are available?
- Are the cameras ready out of the box, or will they require additional configuration or assembly?
- ☐ What camera features are available?
- ☐ What installation and mounting options are available?
- ☐ Is mounting hardware included with the equipment?
- ☐ What internet connection options are available?

Truelook has a Construction Camera for Every Jobsite.
